Subject: ERMS Question

Becky,
I have 8 to 10 memos that I wrote summarizing work I did for the Physical Lab, such as qualifying the new cigarette length tester, the Borgwaldt A10, etc. These were not instrument validations....they summarized comparison testing to show that we could test on the old and new instruments and get comparable results. Paper copies are on file in the lab. Do I need to send these to ERMS?

Thanks,

PM3000992713
